

Dimensioni: 54x72x72 cm
Peso netto: 55 kg
Capacità di dosaggio: 25ml-50ml-100ml
150ml-250ml-500ml
Pressione di esercizio: 6 bar/87 psi

Dimensions: 54x72x72 cm
 Poids net: 55 kg
 Capacité de remplissage: 25ml-50ml-
 100ml 150ml-250ml-500ml
 Pression d'utilisation: 6 bar/87 psi

Dimensions: 54x72x72 cm
 Net weight: 55 kg
 Filling range: 25ml-50ml-100ml
 150ml-250ml-500ml
 Working pressure: 6 bar/87 psi

 **Macchina dosatrice volumetrica ad azionamento pneumatico, destinata al riempimento di liquidi e prodotti semidensi. Struttura interamente realizzata in lega leggera e acciaio inox. Il dosaggio viene effettuato tramite i due dosatori posti ai lati della macchina. La completa mancanza di parti elettriche, permette l'utilizzo in ogni ambiente.**

 **Remplisseuse volumétrique à actionnement pneumatique, destinée au remplissage de liquides et produits semi-denses. Structure entièrement réalisée en alliage léger et acier inox. Le remplissage est effectué à partir de deux cylindres placés de part et d'autre de la machine. L'absence complète d'éléments électriques permet l'utilisation de cette machine dans n'importe quel contexte.**

 **Pneumatic volumetric filling machine. Designed for liquid product filling, structure manufactured in aluminium and stainless steel. Filling operation is operated by two volumetric filling pistons situated on side of machine main body. This machine is suitable to work in any environment as no electrical parts are involved.**
